

CHERIE K. BERRY COMMISSIONER

JOHN R. BOGNER, JR. CONSULTATIVE SERVICES BUREAU CHIEF DIVISION OF OCCUPATIONAL SAFETY AND HEALTH

## Hazard Communications Program Lee County Schools

(Company Name)

- I. This program will describe how Lee County Schools intends to protect the safety and health of our employees who are exposed to hazardous chemicals in the workplace, and to comply with the provisions of 29 CFR 1910.1200.
- II. Tina Poltrock has been assigned the title of Hazard Communication Program Monitor and is responsible for monitoring all related activities to ensure compliance with both the intent and specifics of this program.

Each supervisor will be held responsible for strict adherence to these policies and will closely monitor all activities involving hazardous chemicals.

Each employee will carefully follow established work practices and promptly report observed or potential problems to supervision.

There is no job at Lee County Schools so vital or urgent as to justify the risk of employee overexposure to a hazardous chemical. Ask when in doubt. Proceed with a job only after being satisfied that it is safe for you to do so.

- III. A list of all hazardous chemicals for each workplace has been made and is readily available, upon request, to any employee, working on any shift. It is located in the Principal's office and in the Central Office. It is available electronically and as a hard copy.
- IV. A Material Safety Data Sheet (MSDS) or Safety Data Sheet (SDS) for each hazardous chemical on the list referenced above is on file at the Principal's office of the school where the chemical is found.
  - The MSDS/SDS are accessible during each work shift for any employee to review. If you have further questions about the MSDS/SDS program, contact your supervisor.
- V. The School Chemical Hygiene Officer is responsible to ensure that the list of hazardous chemicals is kept current and that a current MSDS/SDS for each hazardous chemical used is on hand. A chemical that is not shown on the current list will not be ordered without prior coordination with the School Chemical Hygiene Officer.
- VI. All containers of hazardous chemicals in each workplace will be conspicuously labeled with the

identity of the chemical (same as on the applicable MSDS/SDS), and the appropriate hazard warnings. If the chemical is a known or suspected cancer causing agent (carcinogen), or if it is known to affect a specific organ of the body, this information will also be placed on the container label. The person having supervisory responsibility for the storage or use of each hazardous chemical will ensure that such labels are not defaced and that they remain legible at all times.

School Chemical Hygiene Officers, Jerry Pittman, Mary Hawley Oates, Jeanne Ellington, and Reid Cagel will ensure that an adequate supply of labels is kept on hand and made available to the responsible supervisors.

- VII. Jerry Pittman is responsible for anticipating, as much as possible, the hazards that would be present for non-routine tasks, such as chemical spill or container rupture. Clean-up procedures and proper personal protective equipment shall be considered and adequate training for such tasks shall be addressed.
- VIII. When an outside contractor will be used, it will be the responsibility of Dr. Jim Atkinson, Assistant Superintendent Auxiliary Services, and Jerry Pittman, Maintenance and Facilities Director, to advise the contractor of any hazardous chemicals to which their employees may be exposed and the appropriate protective measures to be taken. Conversely, it will be the same person's responsibility to determine if the contractor will be using any hazardous chemicals during this work that would expose Lee County Schools employees. Appropriate training and protective measures must be taken in order to protect Lee County Schools employees. Prior to any work being performed by an outside contractor involving hazardous chemicals, Dr. Jim Atkinson and Jerry Pittman are to be advised.
- IX. All employees exposed to any hazardous chemicals will complete an information and training program which includes at least the subjects listed below. New employees must complete similar instruction before initial exposure to any hazardous chemical in the workplace.

Adequate training of all employees exposed to hazardous chemicals will be given by Jerry Pittman, Glenda Jones, Assistant Superintendent Human Resources, Jeanne Ellington, Mary Hawley Oates, and School Chemical Hygiene Officers, assisted as needed by the Hazard Communication Program Monitor.

Employee information for this program will include:

- (1) The purpose and need for such a program, including the basic concept that gives every employee the right to know about hazardous chemicals with which they work.
- (2) The location and availability of the written Hazard Communication Program, plus the list of hazardous chemicals and their corresponding MSDS/SDSs.
- (3) The identity upon request, of any chemical to which the employee is exposed. In the case of a trade secret chemical, the name shown on the MSDS will be provided.

Employee training shall include at least the following:

(1) The physical and health hazards associated with each chemical, as specified in the MSDS.

- (2) Action that employees can take to protect their own safety and health, including specific procedures that have been established for normal work practices, emergency procedures, and policies on the use of personal protective equipment.
- (3) Details of the Hazard Communication Program, including an explanation of the labeling system used on in-house containers of hazardous chemicals. Also, details of how employees can obtain and use information contained in the MSDS.
- X. It is the intent of <u>Lee County Schools</u> management to protect the safety and health of each employee, our most valuable and valued asset. By following correct procedures, no employee should experience any harmful effects from working with chemicals in their workplace.

CSB 05/08/2006 Revision 2

Chemicals In LCS
409
1 bottle of glue
1 box of 20 oil pastels
1 boxes of clored pencils
1 can spray fix
1 containter of Solutions Glass cleaner
1 drying cart with recycled clay
1 gl. Industrurial enamel
1 gl. Latex paint
1 gl. Plaster pf Paris
1 gl. Turpentine
1 gallon of oil paint cleaner
1- gallon True-Flow Varnish Matte
1 jug wood glue refill
1 large trash can of rehydrated clay
1 lb. Painters putty
1 Leather dye
1 spray paint
1 spray paint
1 tape remover
1% Cream Rinse
1,10-phenanthronine (s)
134 oz Sanitizer Spray
16oz Correction Fluid
17oz White Out
1`-4oz Craft glue
10 boxes of 24 artist pastels
10 boxes of pastel sticks
10 boxes oil pastels
100% Aloe Vera Gel
102 Aluminum/Brass Base (Medium)
10-2lb blocks
1-1 gLCSon High Gloss
1-1 oz Model & Hobby Cement
1-10oz Hand Sanitizer
1-11oz Clear Polyurethane
1-11oz High Gloss Lacquer
1-11oz spray adhesive
1-12 sq. box of chalk pastels
1-12oz Glass Etching Cream
1-13oz Spray fix
1-16oz Blue Tak Adhesive
1-16oz. Clear Gel Medium
11-7.6 oz glue
1-1gLCSon glue
1-1lb. Glaze Suspender #2

Chemicals In LCS
1-1oz super adhesive
1-1oz Watercolor Magic
1-1Qt. Rubber Cement
12- Box Chalk Pastel
12 boxes of oil pastels
12 Dry Erase markers
12 Expo 2 Dry Erase Markers
12 glue sticks
12 jars of Ceramic Glazes
12 pk set watercolor paint - 15
12 Redi mark markers
12 Tempera tube samples
124 oz acrylic tubes
1-2.5 oz acrylic tube
1-20 oz cleaner
1-22ml correction fluid
1-28 oz cleaner
1-2gLCS. Latex sand texture
1-2oz glue
1-2oz Hand Sanitizer
1-2oz Solvent Cement
1-3.7 oz plumbing adhesive
13-7.6 oz glue
1-3oz Spray Mount
13W Compact Flourescent lamps
1-4.1 oz Rubber Cement
1-4.5 oz Solvent remover
14-16oz. Liquid Tempera
14-1oz Drawing Ink
14H THREAD SEALANT W/ TEFLON .25PT
1-4lb unsanded grout
1-4oz Acrylic Polymer
1-4oz Glue
1-4oz grout repair
1-4oz Stencil Stik
1-4oz. Acrylic tube
15 bags of recycled clay
16 jars of Ceramic Glazes
16 oz acrylic paint - 12
16 oz acrylic paint - 24
16 Watercolor Palettes
16-4oz. Liquid Metal Acrylic
1-6oz Cooking Spray
17 boxes soft pastels
17R20 6.3V
18-16oz Acrylic paints
