

Move posts to the top of the class stream

By default, posts in the class stream are arranged in order of the date and time they are posted. The most recent announcement you post, assignment you create, or question you ask, becomes the top item in the class stream. You can change the order of posts in the class stream by moving any item to the top of the stream. However, it only stays at the top until the next post is created.

To move a post in the class stream:

1. Sign in to Classroom at classroom.google.com.
2. Click the class.
3. Click the item in the class stream.
4. Click  .
5. Click **Move to top**.

Note: When you move a post to the top of the stream, students get a notification by email or on their mobile devices if notifications are set up on their devices.
